- CGPA : 9.92

PERSONAL PROJECTS

Story Corner (MERN)

- <https://github.com/JashuBhardwaj/Story-Corner.git>
- This is a React based web application where users can read different stories according to their interests and can write their own stories and other users can read them and comment on them. It also consists of user login authentication where users can register for this site. The application is made in React JS and the data is stored in MongoDB and authentication is done using JWT tokens.

Student Database Management System in C

- https://github.com/JashuBhardwaj/C-with-linux/tree/main/Project_1/Database_Management_System
- It is a C language based application which helps in managing the database of a large no. of students in a school or university. It provides an interactive interface to the user, easy to understand and fast response to the user. You can manage a large database using this application effectively. It is based on File Management in C basics.
